

CORE

DSS • ENGINE

One Source of Truth. Better Decisions start with Better Data.

RELY ON ONE
SINGLE
SOURCE
OF TRUTH

The CostFlex Intelligence Platform is powered by the Core DSS Engine, a healthcare-specific SQL Server foundation that unifies clinical, financial, reimbursement, and operational data along with the Enterprise Reporting application to give end users access the Core DSS Engine and its underlying data.

FASTER DECISIONS

Real-time insights
when and where you
need them

BUILT FOR HEALTHCARE

Designed for the complexity of
healthcare finance and
operations

PARTNER, NOT JUST VENDOR

Dedicated support and
expertise to help achieve your
strategic goals

CostFlex Intelligence Platform

Data Sources

Bring All of Your Data
Together

EMR/EHR

Financial Data

Productivity

Core Measures

835/837 Data

Core DSS Engine

Unify, Validate, Standardize

Insights

Turn Data into Action

Reporting

Turn complex data into
clear, interactive visual
insights.

Visualizations

Quickly access unified
data from across
EMR/EHR, financial
systems, and operational
sources.

Data Retrieval

Deliver accurate,
actionable reports across
financial, clinical, and
operational data, all from a
single source of truth.

CORE

DSS • ENGINE

What Powers the CostFlex Core DSS Engine?

At its core, CostFlex combines a robust SQL-based data layer with intuitive reporting tools. Together, they transform complex operational data into clear, actionable insight.

Data Integration

Connects to the systems you already use:

- EMR and EHR platforms
- Financial and general ledger systems
- Operational and clinical systems

Common data inputs include:

- Patient charges, payments, and adjustments
- Demographics and encounter details
- General ledger and payroll data
- 837 and 835 files
- Time-based activity data across departments
- OR time and any other time stamp data
- Supply and pharmacy costs

New data feeds are included as part of your subscription, helping keep your system adaptable without added cost.

Reporting and Exploration

Turn data into direction

- Pre-built and customizable reports
- Interactive dashboards and visualizations
- Self-service exploration for end users
- Consistent metrics across the organization

Implementation & Access

Simple, Structured Rollout

CostFlex guides your team through setup, integration, and training.

Flexible Hosting Options

Deploy on your own infrastructure or choose CostFlex hosting.

Enterprise Licensing

A single site license covers all included entities, supporting growth without complexity.

Core Capabilities

Flexible Data Loading

Daily, weekly, or monthly updates to match your operations.

Multi-Entity Support

Manage multiple facilities within a single system, with controlled user access by entity.

Built-In Audit Confidence

Every patient record accessed is logged, supporting transparency and compliance.

Automatic Data Expansion

New departments, accounts, and codes are recognized and added during load, no manual cleanup required.

Platform Compatibility

CostFlex is designed to integrate with virtually any healthcare system on the market, including:

- EPIC
- Cerner
- Meditech
- CPSI / Evident
- Infor / Lawson
- Other widely used platforms across the market.
